---

## Construction Values

Permit values shall be determined by using the latest ICC Building Valuation Data using the South Carolina multiplier or construction cost, whichever is higher.

---

**PENALTIES: PERMIT FEES SHALL BE DOUBLED IF CONSTRUCTION BEGINS PRIOR TO OBTAINING PERMITS.**

---

# **Building Permit - Zoning Compliance**

A certificate of zoning compliance is required for the construction of a new building or structure, or the alteration of an existing building or structure. Two (2) copies of a site plan must accompany all applications for a certificate. Site plan requirements depend upon the type of development.

## **Commercial, Multi- Family, Institutional or Industrial**

1. Site plans must be drawn by a licensed surveyor, architect, engineer or land planner and must bear the seal of the drawer.
2. Plans must be drawn to scale and show the following:
  - Scale
  - North arrow
  - Street address of subject parcel
  - Current zoning classification
  - Names of all abutting streets
  - All parcel lines of the subject parcel, with dimensions shown
  - Exact location of all buildings and structures, with dimensions of footprints shown
  - Setback and buffer areas required under provisions of the zoning ordinance
  - Exact location of all existing signs, accessory buildings and structures, with footprint dimensions shown
  - Exact location of proposed building, accessory structures, and signs with footprint dimensions of all structures shown
  - Exact location of all parking lots driveways and loading zones, with the width of each driveway shown and the dimension of parking spaces indicated
  - Number of parking spaces to be installed is to be indicated (minimum 90 degree parking is 9' x 20')
  - Exact location of any lakes, ponds, retention areas, rivers, bodies of water or 100 year floodplain areas
  - Any legally recorded easements

## **Single Family Dwellings and Accessory Structures**

1. Two (2) copies of a sketch of the subject parcel drawn to scale (no official seal is required)
2. Sketch must include the following:
  - Scale
  - Street address of the subject parcel
  - All parcel lines
  - Names of all abutting streets
  - The exact location and footprint dimensions of the proposed single-family dwelling and/or accessory structure(s).

## **Sign Permits**

Application must be accompanied by two (2) copies of a sketch of the parcel on which the sign is located, structural drawings of the sign with dimensions, dimensions of building for wall signs, and foundation plans for free standing signs (if required by the Building Official). The cost of the permit is based on sign value with a minimum cost of \$15.00.

**Note:** Site plans can be submitted to the Building Official at the same time building or construction drawings are submitted. The Planning Department will review only site plans. However, the Building Official cannot issue a building permit until the certificate of zoning compliance has been issued by the Planning Department.

---

Fill in the address of development, nature of the project

I, the owner/agent of the above property have been notified of the following:

**Storm Drainage Related Requirements  
Ordinance 2001-19, Section 6-8  
Town of Moncks Corner Land Development Regulations  
Enacted December 18, 2001**

*"An adequate drainage system, including necessary improved open channels, pipes, culverts, storm sewers, intersection drains, drop inlet, bridges, and other necessary appurtenances shall be installed by the subdivider and shall be according to plans and specifications approved by the Berkeley County Director of Public Works."*

If you are developing a property in the Town of Moncks Corner, it is the responsibility of the owner developing the property to insure that a storm water drainage plan is submitted to Berkeley County Engineering Department for approval. These plans must be submitted in accordance to Berkeley County's requirements. They will indicate the manner, direction, and rate water will flow on and off the property.

If the storm water flows off the property and impacts a publicly maintained road's storm water drainage, the owner of the development is responsible for obtaining encroachment permits or other approvals from those entities that maintain the road.

Applicable State and Federal regulations such as DHEC OCRM or US Army COE may apply to your project. It is the owner's responsibility to meet these regulations and no employee of the Town has authority to give approvals or modifications to State or Federal regulatory matters.

The Town will not issue a building permit until storm water plans are submitted and approved by the County Engineer's Office and applicable state and Federal agencies.

The Town will not issue a certificate of occupancy until a professional engineer or registered surveyor provides a signed (with raised seal) documentation that the lot has been built and graded according to the submitted plans.
